## Chief Financial Officer's Comments

We are pleased to release the financial results for the first quarter for 2019 which is up by $5 \%$ compared to the same period last year which is a direct result of the in-house foreign exchange which yielded a total profit percentage of $6 \%$ in the current period as this new business only commenced in May 2018.

The student numbers from the Japanese market decreased by $17 \%$ in comparison to last year which is reflected in the decrease in services fee income and in-house insurance. However, student numbers from the non-Japanese markets increased by 66\% directly reflective of Management's attempts to diversify the student market and tap in to other non-Japanese markets.

As previously highlighted in various market announcements, the decline is solely attributed to the strong continuous growth in the Japanese economy boosts employment opportunities for the Japanese people and making studying abroad a lesser choice of the two.

The Board and Management continue to work closely with their stakeholders in the non-Japanese markets to market FBL and Fiji as a study abroad destination and with the hope to address or counter the decline in students from the Japanese markets.

The results also show an increase in the Earnings per share by $5 \%$ and an increase in its total assets by $8 \%$ in comparison to the same period last year.
