MARKET ANNOUNCEMENT

- Approval of facility to be used as a Managed Isolation Facility

We would like to advise the market that we have been approached by the Ministry of Health (MOH) requesting the use of our Lautoka Dormitory to be used as a Managed Isolation Facility (MIQ). This MIQ will be used to accommodate asymptomatic positive COVID-19 patients in the West. Our Lautoka campus has been closed for operations since April this year as a result of the second wave and as a result, an approval was given to the Ministry of Health.

Hence, the campus is now under the control and management of the Ministry of Health and the Fiji Military Forces and they have started to admit patients to the facility from 13 July 2021. The MOH is responsible for ensuring that the campus is fully equipped with the necessities and provide for any structural enhancements required at their cost.

FBL also wishes to advise the public that it is not receiving any income from MOH for this approval but have requested MOH to pay for the costs incurred in the use of such facilities such as utility bills, repairs to any damages caused during this period and to ensure that our property is returned to us in the state it was given.

The Management acknowledges the assistance that the MOH require and we will continue to support their efforts as well as all the front liners who continue to work tirelessly to keep us, our families and our communities safe. We all have a social responsibility and a role to play in the containment and the reduction in the spread of the virus in our communities by strictly adhering to the health advice.

Please take care and stay safe.
